To
The Board of Directors,
Gandhar Oil Refinery (India) Ltd. (the "Company")
18th Floor, DLH Park, S.V. Road,
Goregaon (W), Mumbai 400062, India.

Dear Sirs,

We have verified the translated version of the audited consolidated financial statements of Texol Lubritech FZC for the year ended 31st March 2023. These consolidated financial statement were prepared in the functional currency in AED and have been translated in reporting currency in INR in accordance with Ind AS 21, The Effect of Changes in Foreign Currency Rates. The work is carried out by us in accordance with the Standard on Related Services (SRS) 4400, "Engagements to Perform Agreed upon Procedures regarding Financial Information" issued by the Institute of Chartered Accountants of India.

As required under Schedule VI Part A Item no. (11)(1)(A)(ii)(b) of Securities and Exchange Board of India (Issue of Capital and Disclosure Requirements) Regulations, 2018, as amended ("SEBI ICDR Regulations"), we have verified the translated consolidated financial information contained in the Annexures attached to this certificate which is proposed to be uploaded on the website of Gandhar Oil Refinery (India) Limited in connection with its proposed initial public offering of equity shares of Gandhar Oil Refinery (India) Limited.

We did not audit or review the consolidated financial statements of Texol Lubritech FZC. These consolidated financial statements have been audited by other audit firm and we do not express any assurance on the same.

These translated consolidated financials should not in any way be construed as a reissuance or redating of any of the previous audit reports, nor should these be construed as a new opinion on any of the audited consolidated financial statements referred to herein.

These translated consolidated financials are intended solely for the use of management of the company for uploading on website of Gandhar Oil Refinery (India) Limited in connection with the Initial Public Offering of equity shares of the Company.

This certificate is not intended for general circulation or publication and is not to be reproduced or used for any other purpose without prior consent in writing, other than the purpose stated above. We, however, hereby give the consent for inclusion of our name and this information (in full or in part) in the updated draft red herring prospectus (UDRHP), red herring prospectus (RHP) and Prospectus to be filed by Gandhar Oil Refinery (India) Limited with the Security and Exchange Board of India ("SEBI"), Stock Exchanges where the equity shares of Gandhar Oil Refinery (India) Limited are proposed to be

listed ("the Stock Exchanges") and the registrar of the company, Maharashtra ("ROC") and any other material used in connection with the offer and submission of this certificate to SEBI, Stock Exchanges or ROC in connection with the proposed offer, as the case may be.

The above Certificate is based on the information and explanations provided by the management of Gandhar Oil Refinery (India) Limited and its subsidiary Texol Lubritech FZC without having any financial obligation on our part in any respect whatever more particularly as guarantor or otherwise.

# For Kailash Chand Jain & Co.

Consolidated Notes forming part of the translated financial statement for the year ended March 31, 2023

#### 1) General Information

Texol Lubritech FZC (the parent company) is a Free Zone Company with Limited Liability registered with Hamriyah Free Zone Authority (HAFZA), Hamriyah Free Zone, Sharjah, United Arab Emirates. The registered office and principal place of business of the parent company is P.O. Box. 50802, Hamriyah Free Zone, Sharjah, United Arab Emirates.

The licensed activities of the parent company are manufacturing of lubricants, white oil, transformer oil, beauty products & specialty products and import, export & trading of oil, petroleum products, lubricants and petrochemicals.

Texol Lubricants Manufacturing L.L.C. (the subsidary) is a Limited Liability Company incorporated in Ajman, United Arab Emirates. The Registered office address of the subsidary is P.O. Box. 1038, Ajman, United Arab Emirates and principal place of business is located in Ajman, UAE.

The principal activities of the subsidiary include manufacturing of lubricants & coolants and packaging of grease and lubricants

The parent company is holding 100% beneficial ownership of the subsidiary and these consolidated financial statements comprise the financial statements of the parent company and its subsidiary (collectively referred to as 'the group').

#### 2) Summary of significant accounting policies

#### 2.1 Basis of preparation and presentation of financial information

The Financial Statement have been prepared by the Management of the parent company for the purpose of inclusion in the Red Herring prospectus ("RHP") prepared by the parent company in connection with its proposed Initial Public Offer of equity shares ("IPO") prepared in terms of the requirements of

- (a) In accordance with Schedule VI Part A Item no. (11)(I)(A)(ii)(b) of securities and Exchange Board of India (issue of capital and Disclosure Requirement) Regulations, 2018, as amended ("SEBI ICDR Regulations")
- (b) Converting the financial statements from the reporting currency i.e. AED to INR translated financial statements including the notes thereto in accordance with Ind AS 21.

# 2.2 Basis of consolidation

The consolidated financial statements incorporate the financial statements of the company and entities (inculding structured entities) controlled by the company. Control is achieved when the company has power over the investee; is exposed, or has the rights to the variable returns. The company reassesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control listed.

When the company has less than a majority of the voting rights of an investee, it has the power over the investee when the voting rights are sufficient to give it the practical ability to direct the relevent activities of the investee unilaterally. The company considers all relevent facts and circumstances in assessing whether or not the company's voting rights in an investee are sufficient to give it power.

Consolidation of a subsidiary begins when the company obtains control over the subsidiary and ceases when the company loses control of the subsidiary. Profit and Loss and each component of other comprehensive income are attributed to the owenrs of the company and to the non-controlling interests. Total comprehensive income of subsidiaries is attributed to the owners of the company and to the non-controlling interests even if this results in the non-controlling interests having a deficit balance.

when necessary, adjustments are made to the financial statements of subsidiaries to bring their accounting policies into line with the Group's accounting polices. All intragroup assets and liabilities, equity, income, expenses and cash flows are relating to transactions between members of the Group are eliminated in full on consolidation.

### 2.3 Property, plant and equipment

Property, plant and equipment is stated at cost less accumulated depreciation and identified impairment losses, if any. Cost includes expenditure that is directly attributable to the acquisition of the items including installation costs. Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the parent company and the cost of the item can be measured reliably. All other repairs and maintenance expenses are charged to the profit or loss during the reporting period in which they are incurred.

Capital work-in-progress is stated at cost, less any recognised impairment loss. Depreciation of these assets commences when the assets are ready for their intended use.

The depreciation is calculated on a straight-line basis over the estimated useful lives of the assets, as follows;

Description of the Asset	Estimated Useful Life (Years)
Buildings and improvements	10-40
Storage tanks	40
Plant and machinery	4-40
Tools and other equipments	10-40
Furnitures, fixtures and other equipment	4-10
Motor vehicles	4

In the case of buildings & improvements and storage tanks constructed on leased land, it is assumed that the lease will continue to be renewed over the useful life.

The asset's residual values and useful lives are reviewed at the end of the reporting period, with the effect of any changes in estimates adjusted on a prospective basis. An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount.

The gains or losses arising on the disposal or retirement of an item of property, plant and equipment is determined by comparing the disposal proceeds with the carrying amount of the asset and is recognised in the profit or loss.

#### 2.3 Leases

The Group assesses whether a contract is or contains a lease, at inception of the contract. The Group recognises a right-of-use asset and a corresponding lease liability with respect to all lease arrangements in which it is the lessee, except for short-term leases (defined as leases with a lease term of 12 months or less) and leases of low value assets. For these leases, the Group recognises the lease payments as an operating expense on a straight-line basis over the term of the lease.

Lease liabilities are measured at the present value of the contractual payments due to the lessor over the lease term, with the discount rate determined by reference to the rate inherent in the lease unless (as is typically the case) this is not readily determinable, in which case the group's incremental borrowing rate on commencement of the lease is used. Variable lease payments are only included in the measurement of the lease liability if they depend on an index or rate. In such cases, the initial measurement of the lease liability assumes the variable element will remain unchanged throughout the lease term. Other variable lease payments are expensed in the period to which they relate.

On initial recognition, the carrying value of the lease liability also includes:

- amounts expected to be payable under any residual value guarantee;
- the exercise price of any purchase option granted in favour of the group if it is reasonably certain to assess that option:
- any penalties payable for terminating the lease, if the term of the lease has been estimated on the basis of termination option being exercised.

Right-of-use assets are initially measured at the amount of the lease liability, reduced for any lease incentives received, and increased for:

- -lease payments made at or before commencement of the lease;
- -Mitial direct costs incurred: and
- -the amount of any provision recognised where the group is contractually required to dismantle, remove or restore the leased asset.

Subsequent to initial measurement, lease liabilities increase as a result of interest charged at a constant rate on the balance outstanding and are reduced for lease payments made. Right-of-use assets are amortised on a straight-line basis over the remaining term of the lease or over the remaining economic life of the asset if, rarely, this is judged to be shorter than the lease term.

When the group revises its estimate of the term of any lease (because, for example, it re- assesses the probability of a lease extension or termination option being exercised), it adjusts the carrying amount of the lease liability to reflect the payments to make over the revised term, which are discounted using a revised discount rate. The carrying value of lease liabilities is similarly revised when the variable element of future lease payments dependent on a rate or index is revised, except the discount rate remains unchanged. In both cases an equivalent adjustment is made to the carrying value of the right-of-use asset, with the revised carrying amount being amortised over the remaining (revised) lease term. If the carrying amount of the right-of-use asset is adjusted to zero, any further reduction is recognised in profit or loss.

When the group renegotiates the contractual terms of a lease with the lessor, the accounting depends on the nature of the modification:

- if the renegotiation results in one or more additional assets being leased for an amount commensurate with the standalone price for the additional rights-of-use obtained, the modification is accounted for as a separate lease in accordance with the above policy.
- in all other cases where the renegotiation increases the scope of the lease (whether that is an extension to the lease term, or one or more additional assets being leased), the lease liability is remeasured using the discount rate applicable on the modification date, with the right-of-use asset being adjusted by the same amount.
- if the renegotiation results in a decrease in the scope of the lease, both the carrying amount of the lease liability and right-of-use asset are reduced by the same proportion to reflect the partial or full termination of the lease with any difference recognised in profit or loss. The lease liability is then further adjusted to ensure its carrying amount reflects the amount of the renegotiated payments over the renegotiated term, with the modified lease payments discounted at the rate applicable on the modification date. The right-of-use asset is adjusted by the same amount.

For contracts that both convey a right to the group to use an identified asset and require services to be provided to the group by the lessor, the group has elected to account for the entire contract as a lease, i.e. it does not allocate any amount of the contractual payments to, and account separately for, any services provided by the supplier as part of the contract.

#### 2.4 Intangible Assets

Intangible assets acquired separately are measured on initial recognition at cost. Following initial recognition, intangible assets are carried at cost less any accumulated amortisation and any accumulated impairment losses.

Intangible assets are amortised over the useful economic life and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortisation period and the amortisation method are reviewed at least at each reporting period end.

Intangible assets represent trademarks and software are amortised over their estimated useful life of 10 & 8 years respectively.

#### 2.5 Inventories

Inventories are valued at the lower of cost and net realisable value. Cost is determined on a weighted average cost basis and comprises direct materials and, where applicable, direct labour costs and those overheads that have been incurred in bringing them to their present location and condition. Net realisable value represents the estimate of the selling price in the ordinary course of business, less all estimated costs to completion and costs necessary to make the sale

Costs incurred in bringing each item to its present location and condition are accounted for as follows:

a. Raw materials, packing materials

- Purchase cost

and Consumables

b.Finished goods

Cost of direct materials and labour and a portion of overheads based on normal operating capacity but excluding borrowing costs.

# 2.6 Impairment of property, plant and equipment, right-of-use and intangible assets

At the end of each reporting period, the Group reviews the carrying amounts of its property, plant and equipment, right-of-use and intangible assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss (if any). Where it is not possible to estimate the recoverable amount of an individual asset, the Group estimates the recoverable amount of the cash-generating unit to which the asset belongs. Where a reasonable and consistent basis of allocation can be identified, corporate assets are also allocated to individual cash-generating units, or otherwise they are allocated to the smallest group of cashgenerating units for which a reasonable and consistent allocation basis can be identified.

Recoverable amount is the higher of fair value less costs to sell and value in use.

If the recoverable amount of an asset (or cash-generating unit) is estimated to be less than its carrying amount, the carrying amount of the asset (cash-generating unit) is reduced to its recoverable amount. An impairment loss is recognised immediately in the profit or loss, unless the relevant asset is carried at a revalued amount, in which case the impairment loss is treated as a revaluation decrease.

Where an impairment loss subsequently reverses, the carrying amount of the asset (cash- generating unit) is increased to the revised estimate of its recoverable amount, so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset (cash-generating unit) in prior years. A reversal of an impairment loss is recognised immediately in the profit or loss, unless the relevant asset is carried at a revalued amount, in which case the reversal of the impairment loss is treated as revaluation increase.

Notes forming part of the translated financial statement for the year ended March 31, 2023

#### 2.7 Financial Instruments

Financial assets and financial liabilities are recognised in the Group's consolidated statement of financial position when the Group becomes a party to the contractual provisions of the instrument.

Financial assets and financial liabilities (unless it is a trade receivable without a significant financing component that is initially measured at the transaction price) are initially measured at fair value plus or minus, for an item not at FVTPL, transaction costs that are directly attributable to its acquisition.

#### Financial assets

A financial asset is classified as measured at: amortised cost; fair value through other comprehensive income "FVTOCI" — debt investment; fair value through other comprehensive income "FVTOCI" — equity investment; or fair value through profit or loss ("FVTPL"). The classification of financial assets is generally based on the business model in which a financial asset is managed and its contractual cash flow characteristics.

A financial asset is measured at amortised cost if it meets both of the following conditions and is not designated as at FVTPL: it is held within a business model whose objective is to hold assets to collect contractual cash flows; and

- its contractual terms give rise on specified dates to cash flows that are; solely; payments of principal and interest on the outstanding principal amount.

All financial assets of the Group are classified as and are subsequently measured at amortised cost using the effective interest method and is reduced by impairment losses. Interest income, foreign exchange gains and losses and impairment losses are recognised in profit or loss.

The Group derecognises a financial asset only when the contractual rights to the cash flows from the asset expire, or when it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another entity. On derecognition of a financial asset measured at amortised cost, the difference between the asset's carrying amount and the sum of the consideration received and receivable is recognised in profit or loss.

# **Financial Liabilities**

Financial liabilities are classified as measured at amortised cost or FVTPL. A financial liability is classified as at FVTPL if it is classified as held-for-trading, it is a derivative or it is designated as such on initial recognition. Financial liabilities at FVTPL are measured at fair value and net gains and losses, including any interest expense, are recognized in profit or loss. Other financial liabilities are subsequently measured at amortised cost using the effective interest method. Interest expense and foreign exchange gains and losses are recognized in profit or loss.

All financial liabilities of the Group are classified as and are subsequently measured at amortised cost using the effective interest method.

The Group derecognises financial liabilities when, and only when, the Group's obligations are discharged, cancelled or have expired. The difference between the carrying amount of the financial liability derecognised and the sum of consideration paid and payable is recognised in profit or loss.

Notes forming part of the translated financial statement for the year ended March 31, 2023

#### 2.8 Impairment of Financial Assets

'Expected Credit Loss' (ECL) model requires considerable judgement in selecting the inputs to the impairment calculation, based on the Group's past history, existing market conditions as well as forward looking estimates at the end of each reporting period. The Group records an allowance for ECLs for all financial assets at amortised cost, debt investments at FVTOCI, but not to investments in equity instruments.

The Group measures impairment allowances using general or simplified approach as considered appropriate. Loss allowances are measured on either of the following bases:

12 month ECLs: these are ECLs that result from possible default within 12 months after the reporting date; and

Lifetime ECLs: these are ECLs that result from all possible default events over the expected life of a financial instrument.

ECLs under the general approach are a probability weighted estimate of credit losses which are based on the difference between the contractual cash flows due in accordance with the contract and all the cash flows that the Group expects to receive. The shortfall is then discounted at an approximation to the asset's original effective interest rate.

ECLs under the standard's simplified approach are calculated based on lifetime expected credit losses. The Group has established a provision matrix that is based on the Group's historical credit loss experience, adjusted for forward-looking factors specific to the financial assets and the economic environment.

The Group considers a financial asset in default when contractual payments are past due. However, in certain cases, the Group may also consider a financial asset to be in default when internal or external information indicates that the Group is unlikely to receive the outstanding contractual amounts in full before taking into account any credit enhancements held by Group.

### 2.9 Cash and cash Equivalents

Cash and cash equivalents comprise cash on hand and bank deposits free of encumbrance with a maturity date of three months or less from the date of deposit and other short-term highly liquid investments with a maturity date of three months or less from the date of investment, net of temporary bank overdrafts.

# 2.10 Provisions

Provisions are recognised when the Group has a present legal or constructive obligation as a result of past events; it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation; and a reliable estimate can be made of the amount of the obligation. The expense relating to any provision is recognised in the profit or loss, net of any reimbursement.

The amount recognised as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. Where a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows. Provisions are not recognised for future operating losses.

#### 2.11 Borrowings

Borrowings are recognised initially at fair value, net of transaction costs incurred. Borrowings are subsequently measured at amortised cost using the effective interest rate method. Difference between the proceeds (net of transaction costs) and the redemption value is recognised in the profit or loss over the period of the borrowings using the effective interest method.

All borrowing costs are recognised in profit or loss in the period in which they are incurred. Fees paid on the establishment of loan facilities are recognised as transaction costs of the loan to the extent that it is probable that some or all of the facility will be drawn down.

Borrowings are classified as current liabilities unless the Group has an unconditional right prior to the end of the reporting period to defer settlement of the liability for at least 12 months after the reporting date.

#### 2.12 Revenue Recognition

Revenue is recognised when a customer obtains control of the goods. Determining the timing of the transfer of control, at a point in time or over time, requires judgement. The Group recognises revenue from sale of goods based on a five-step model as follows:

- Step 1. Identify the contract(s) with a customer: A contract is defined as an agreement between two or more parties that creates enforceable rights and obligations and sets out the criteria for every contract that must be met.
- Step 2. Identify the performance obligations in the contract: A performance obligation is a promise in a contract with a customer to transfer goods to the customer.
- Step 3. Determine the transaction price: The transaction price is the amount of consideration to which the Group expects to be entitled in exchange for transferring promised goods to a customer, excluding amounts collected on behalf of third parties.
- Step 4. Allocate the transaction price to the performance obligations in the contract: For a contract that has more than one performance obligation, the Group will allocate the transaction price to each performance obligation in an amount that depicts the amount of consideration to which the Group expects to be entitled in exchange for satisfying each performance obligation.
- Step 5. Recognise revenue when (or as) the Group satisfies a performance obligation.

The Group satisfies a performance obligation and recognises revenue over time, if one of the following criteria is met:

- 1. The customer simultaneously receives and consumes the benefits provided by the Group's performance as the Group performs; or
- 2. The Group's performance creates or enhances an asset that the customer controls as the asset is created or enhanced; or
- 3. The Group's performance does not create an asset with an alternative use to the Group and the Group has an enforceable right to payment for performance completed to date.

For performance obligations where one of the above conditions are not met, revenue is recognised at the point in time at which performance obligation is satisfied.

When the Group satisfies a performance obligation by delivering the promised goods, it creates a contract asset based on the amount of consideration earned by the performance. Where the amount of consideration received from a customer exceeds the amount of revenue recognised, this gives rise to a contract liability.

Revenue is measured at the fair value of the consideration received or receivable, taking into account contractually defined terms of payment and excluding taxes and duty.

Sale of goods

Revenue from sale of goods is recognized at the point in time when control of the goods is transferred to the customer, generally on delivery of goods and issuance of the invoices to customers.

Interest income

Interest income is accrued on a time basis, by reference to the principal outstanding and effective interest rate applicable.

#### 26 CRITICAL ACCOUNTING JUDGEMENTS, ESTIMATES AND ASSUMPTIONS:

The preparation of the Group's financial statements requires management to make judgements, estimates and assumptions that affect the reported amounts of revenue, expenses, assets and liabilities, and the disclosure of contingent liabilities, at the end of the reporting period. However, uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of the asset or liability affected in future periods.

Estimates and judgements are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. Actual results may differ from these estimates.

The key assumptions concerning the future and other key sources of estimation uncertainty at the end of the reporting period, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are discussed below;

#### a) Estimated usefuf lines of property, plant & equipment and intangible assets

Management assigns useful lives and residual values to property, plant & equipment and intangible assets based on the intended use and the economic lives of those assets. Subsequent changes in circumstances could result in the actual useful lives or residual values differing from initial estimates. Where management determines that the useful life or residual value of an asset requires amendment, the net book amount in excess of the residual value is depreciated/amortised over the revised remaining useful life.

#### b) Impairment of non-financial assets

Assessments of net recoverable amounts of property, plant and equipment, intangible, right-of-use assets and other non-financial assets are based on assumptions regarding future cash flows expected to be received from the related assets.

#### c) Inventory provisions

The Group reviews the carrying amounts of the inventories at the end of the reporting period and assesses the likely realization proceeds taken into account, the age of inventory, estimated future demand for various items in the inventory, and physical damage etc. Based on the assessment, no provisions are required as at the end of the reporting period.

#### d) Business model assessment

Classification and measurement of financial assets depends on the results of the Solely Payments of Principal and Interest (SPPI) and the business model test. The Group determines the business model at a level that reflects how groups of financial assets are managed together to achieve a particular business objective. This assessment includes judgement reflecting all relevant evidence including how the performance of the assets is evaluated and their performance measured, the risks that affect the performance of the assets and how these are managed and how the managers of the assets are compensated. The Group monitors financial assets measured at amortised cost or fair value through other comprehensive income that are derecognised prior to their maturity to understand the reason for their disposal and whether the reasons are consistent with the objective of the business for which the asset was held. Monitoring is part of the Group's continuous assessment of whether the business model for which the remaining financial assets are held continues to be appropriate and if it is not appropriate whether there has been a change in business model and so a prospective change to the classification of those assets.

### e) Significant increase in Credit risk

ECLs are measured as an allowance equal to 12-month ECL for stage 1 assets, or lifetime ECL for stage 2 or stage 3 assets. An asset moves to stage 2 when its credit risk has increased significantly since initial recognition. IFRS 9 does not define what constitutes a significant increase in credit risk. In assessing whether the credit risk of an asset has significantly increased the Group takes into account qualitative and quantitative reasonable and supportable forward-looking information.

# f) Calculation of loss allowance

When measuring ECL the Group uses reasonable and supportable forward-looking information, which is based on assumptions for the future movement of different economic drivers and how these drivers will affect each other.

Loss given default is an estimate of the loss arising on default. It is based on the difference between the contractual cash flows due and those that the lender would expect to receive, taking into account cash flows from collateral and integral credit enhancements.

Probability of default constitutes a key input in measuring ECL. Probability of default is an estimate of the likelihood of default over a given time horizon, the calculation of which includes historical data, assumptions and expectations of future conditions.

# g) Lease term and useful lives of right-of-use assets

The Group's management determines the lease term as the non-cancellable term of the lease, together with any periods covered by an option to extend the lease if it is reasonably certain to be exercised, or any periods covered by an option to terminate the lease, if it is reasonably certain not to be exercised.

#### 27 COVID-19 Impact

As the outbreak of COVID-19 continues through subsequent phases, the Management is continuously monitoring the situation and will take appropriate actions on a timely basis to respond as necessary. The Group was proactive in implementing a range of measures designed to mitigate the impact of COVID-19 and to fully implement governmental regulations and recommendations to ensure the safety and security of staff and provide, to the extent possible, uninterrupted services. Following the analysis of different possible scenarios, the Management has concluded that sufficient reserves are available in respect of the liquidity and also the equity base of the Group to guarantee continuity of its operations at the date of the authorization of these financial statements. Accordingly, the Management remains wholly satisfied that it is appropriate for the Group to prepare the financial statements on a going concern basis.

# 28 Related Party Transactions

Related parties include the shareholders, key management personnel, fellow subsidiaries, associates, joint ventures, directors and entities which are controlled directly or indirectly by the shareholders or directors or over which they exercise significant management influence. Balances and transactions between the Group and its related parties are described below. Transactions with related parties were entered into on terms agreed by the management.

During the year, the Group entered into the following transactions with related parties:

# 29 Financial Risk Management

### Financial risk factors

The Group's activities expose it to a variety of financial risks: market risk, credit risk and liquidity risk. The Group's overall risk management programme focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the Group's financial performance. Risk management is carried out by the Group's management. The management identifies and evaluates financial risks on regular basis to minimise the adverse impact over the Group's operation.

# (a) Market risk

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises: interest rate risk and currency risk. The Group's activities are exposed primarily to the financial risks of changes in foreign currency exchange rates and interest rates.

### (i) Foreign Currency Risk

Foreign currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. The Group's exposure to the risk of changes in foreign exchange rates relates primarily to the Group's operating activities, when revenue or expense are denominated in a different currency from the Group's functional currency which is AED.

#### (ii) Interest Rate Risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Group's exposure to the risk of changes in market interest rates is limited to its interest bearing assets and liabilities. The Group has interest bearing liabilities as disclosed in Notes 12, 12a and 13. The interest rates on these liabilities are at commercial rates which are generally obtained in the United Arab Emirates.

# (b) Credit Risk

Credit risk is the risk that a counterparty will not meet its obligations under a financial instrument or customer contract, leading to a financial loss. The Group is exposed to credit risk from its operating activities (primarily for trade receivables and committed transactions) and from its financing activities, including deposits with banks, foreign exchange transactions and other financial instruments.

The Group deals only with highly reputed local and international banks. In respect of major customers, credit risk is managed by assessing the credit quality of these major customers, taking into account their financial position, past experience and other factors including regular follow up. Of the trade receivables balance of INR 45.06 Crores (2021: INR 51.48) at the end of the period, INR 42.81 Crores (2022: INR 20.17 Crores) is due from three (31.03.2022: two customers) customers with more than 10% of total balance have been considered).

Notes forming part of the translated financial statement for the year ended March 31, 2023

Significant concentration of credit risk by geography is as follows:

Particulars	As at March 31, 2023 INR	As at March 31, 2022 INR
UAE	69,03,59,676	25,05,80,914
Other Asian Countries	15,53,42,380	10,91,88,585
Other Countries	18,09,67,511	9,08,93,707
	1,02,66,69,566	45,06,63,206

# (c) Liquidity Risk

Liquidity risk refers to the risk that an entity will encounter difficulty in meeting obligations associated with its financial liabilities at maturity date.

The Group manages the liquidity risk through risk management framework for the Group's short, medium and long-term funding and liquidity management requirements by maintaining adequate reserves, sufficient cash and cash equivalent to ensure funds are available to meet its commitments for liabilities as they fall due.

The table analyses the Group's remaining contractual maturity for its financial liabilities based on the remaining period at the end of the reporting period to the contractual maturity date. The amounts disclosed in the table are the contractual undiscounted cash flows. Balances due within 12 months equal their carrying balances as the impact of discounting is not significant. The contractual maturity is based on the earliest date on which the Group may be required to pay.

Particulars	As at March 31, 2023 INR	As at March 31, 2022 INR
Less than 1 year		
Trade Payables	1,88,65,59,622	67,95,34,384
Borrowings	1,35,60,22,823	86,48,83,173
Lease Liabilities	1,62,01,574	1,08,20,250
	3,25,87,84,020	1,55,52,37,807
More than 1 year More than 1 year		
Borrowings	17,89,21,887	28,66,72,219
Lease Liabilities	29,62,61,945	25,05,17,312
Provision for Gratuity	86,64,979	-
	48,38,48,810	53,71,89,530
Total	3,74,26,32,830	2,09,24,27,338

### 30 Commitments and Contingencies

Details of the commitments and outstanding contingent liabilities of the Group which are in the normal course of the business activities are as follows:

# 30.1 Capital commitments

As at the end of the reporting period, the Group has approved capital commitments of INR 79 Lakhs relating to the construction of the storage tanks and implementation of ERP.

### 30.2 Contingent Liabilities

As at the end of the reporting period, the following contingent liabilities were outstanding:

P. dieder		As at March 31, 2023	As at March 31, 2022
Particulars	INR 40.04.70.043	INR	
Letters of Credit		40,84,78,042	27,87,29,516
Guarantees issued in favour of Hamriyah Free Zone			
Authority		48,21,461	37,75,113
Performance Guarantee		-	15,18,957
		41,32,99,503	28,40,23,586

### **30.3 Operating Lease Arrangements**

The Group has entered into commercial leases of certain offices and other business related premises. These leases have an average life of one to ten years and the Group does not have an option to purchase the leased properties at the expiry of the lease period. The Group has recognised a right-of-use asset and a corresponding lease liability with respect to all lease arrangements in which it is the lessee, except for short-term leases (defined as leases with a lease term of 12 months or less and leases of low value assets.

# 31 Fair Value

The fair vaule of a particular assest or liability is the price that would be received to the sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair values of the financials assets and liabilities approximate their carrying amounts as reflected in these consolidated financials statements.

# 32 Other Notes

The translated financial statements have been prepared considering the requirements and presentation as per the standards applicable in India.

Unless otherwise stated, the figures (including previous year figures) under the translated financial statements have been regrouped / rearranged to the extent necessary to conform the fair presentation and current period's classification.

For the purpose of reporting requirement of translation to the reporting/presentation currency, the following has been taken into consideration:

i. Assets and liabilities (except for non-current assets and equity which are reported at historical rate i.e. exchange rates prevailing at the transaction date) have been reported at the prevailing closing rate as at the date of that balance sheet;

ii.Income and expenses for each statement of profit and loss have been reported at yearly average rate except for items of changes in inventories, cost of material consumed and depreciation; and

iii.All accumulated exchange differences have been recognized in other comprehensive income.

33 Since this is the first year of consolidation of the company, and therefore previous figures are not comparable.
